

# YOGESH PATIDAR

Full Stack Developer

+918827054933    @Yogeshpatidar340@gmail.com    https://portfolio-yogesh-lemon.vercel.app/    Indore

## SUMMARY

Briefly explain why you're a great fit for the role - use the AI assistant to tailor this summary for each job posting.

## PROJECTS

### Truly Talk

07/2024 - 08/2024

https://truly-talk.vercel.app/

- Truly Talk, a web application built with Next.js and React.js with MongoDB.
- The platform enabled users to send anonymous messages through profile URLs
- Implemented NextAuth, reducing user validation time by 30% through efficient OTP verification.
- Designed API routes independently, maintaining project individually.

### Grocery store

01/2024 - 06/2024

https://grocery-store-pi.vercel.app/

- Developed a Responsive Grocery Store App that supported {500} product listings for optimized user experience.
- Integrated Strapi CMS, improving content management speed by {40%} for {50} product entries.
- Utilized Tailwind CSS to design a clean interface, increasing user retention by {15%}.

### ChatApp

04/2024 - 05/2024

https://chatapp-ecru-tau.vercel.app/

- Created a real-time messaging application that supported {2000} simultaneous users using modern technologies.
- Implemented responsive design for {100%} of device types, improving cross-platform usability ratings by {35%}.
- Collaborative Contribution: Actively involved in project documentation, bug fixes, and feature implementations, demonstrating strong teamwork skills

### AmazonPro

11/2023 - 02/2024    Location

https://next-amazon-pro.vercel.app/

- Focused on intuitive navigation to deliver a seamless shopping experience
- Integrated Stripe payment gateway, increasing transaction success rate by {25%} for secure transactions.
- Optimized Backend Systems: Utilized React, MongoDB, Stripe, Tailwind CSS, Mongoose, and JWT for enhanced platform performance

### Developed a Travel Advisor Web Application

Date period

- Developed a Travel Advisor Web Application: Leveraged the MERN stack (MongoDB, Express.js, React.js, Node.js) to create a user-friendly platform with features like user registration, login, and personalized recommendations for nearby famous hotels and restaurants
- Integrated Location-Based Services: Implemented map-based guidance for famous travel locations, allowing users to explore and navigate popular destinations easily
- Focused on User Experience and Functionality: Ensured a seamless user experience with necessary features to meet travel needs, such as checking nearby amenities and receiving location-based travel advice

## SKILLS

API	Bootstrap	Computer Architecture	
CSS	CSS3	Database Systems	
Django	Express.js	Firebase	
Front-end	Git	Github	HTML5
Intellij	Java	Javascript	Python
JWT	Mongodb	Mongoose	Mysql
Next.js	Node	Node.js	Python
React.js	Sqlite3	Strapi	Stripe
Tailwind	Tailwind CSS	Vs Code	

## EDUCATION

B.Tech. in Computer Science and Engineering

Swami Vivekanand College of Engineering

08/2019 - 07/2023

- cgpa: 7.84/10
- Main coursework: Computer Architecture, Artificial Intelligence, Database Systems, Operating Systems
- Software Engineering
